New requirements

UC001 - Maintain Projects

- The user can't show all existing project, he is only allowed to show project where he is collaborator or owner.
- Only project owner can delete a project.
- For change project, the user need be project owner or collaborator.
- When a project is deleted all the tasks and sprints related also are deleted.

UC003 - Maintain Sprints

- The user needs to be owner or collaborator of the related project.
- When a sprint is deleted all the tasks related also are deleted.

- Added sprint duration in Sprint Control screen.

UC004 - Create Tasks

- The user needs to be owner or collaborator of the related project.
- The user that creates a task is the accountable of it.

UC005 - Maintain Tasks

- The user needs to be owner or collaborator of the related project.
- When a task is deleted all the subtasks related also are deleted.

UC006 - Generate Reports

- The user needs to be owner or collaborator of the related project.
- The system do not generate a file, only show the statistical data.

Open issues

The owner of a task is changed when it is edited. For example: User 1 is owner of Task 1, but User 2 changes Task 1 description, now User 2 is the owner of such task.
